

IBM i2 Analyst's Notebook Introduction to Importing Overview

Duration: 2 hours

Cost: £100 pp + VAT

Online - Live virtual classroom training, guided by one of our experienced i2 trainers, and with each delegate accessing a personal virtual machine

Class size: A maximum of 10 delegates

"I want to be able to create charts quickly from data stored in Excel workbooks, but in a structured way that enables effective analysis."

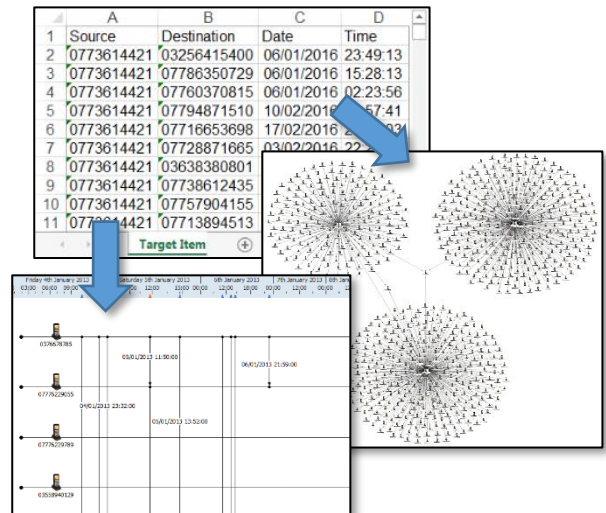

Course Content

- Introduction to Importing
- Importing to create Association Charts
- Importing to create Timeline Flow Charts
- Populating key Chart Properties for Entities and Links to allow for effective future analysis, including:
 - Identities
 - Labels
 - Types
 - Attributes
 - Date & Time
- Speeding up the process:
 - Choosing the appropriate Design
 - Using accelerators within the Importer
- Introduction to cleansing your data with Column Actions
- Awareness of the resulting charts' analytical potential

What data will I use?

You will use example data that includes:

- Telephone Calls
- Company information
- People
- IP Addresses

What skills will I gain?

You will learn how to:

Create Import Specifications that will allow you to quickly generate both association and timeline flow charts. Apply the use of key properties such as Identity, Label, Type, Date & Time, and Attributes – allowing the effective creation of charts for accurate analysis.

What can I expect?

Our experienced trainers will provide a tutor led supportive training environment using a video conferencing platform – we will make the session friendly and interactive where you can ask questions and talk to the trainer, as well as other delegates. To make sure you have plenty of hands-on experience using the software we will provide each delegate with a virtual machine which will have all the i2 software and course files you will need.

Skills Prerequisites

You must be familiar with Microsoft Windows and opening, closing, and saving files. All courses are conducted in English so you should have a good understanding of spoken and written English.

Technical Requirements

For the best experience you will need to install the following:

1. Amazon WorkSpaces Client
2. Zoom Client

It is a simple process and we will send all the relevant links and details on how to do this. These need to be installed before the course.

You could use your own personal computers to attend this training as we provide the training environment which includes the i2 IBM software and course materials. This is an option being used by customers where IT policy prevents them installing the Amazon WorkSpace and Zoom client software on work computers.

Is this the right course for you?

This course is aimed at new and self-taught users, or those who want to refresh their knowledge.

Where Next?

Other online modules will be available, please contact us for more details.

Training Data used in our Online Modules

Our online modules are run using sets of training data that we have created to look and feel familiar to you. We will never ask you to use or provide examples of your data, or be in a position to access it.

Our online modules are run using virtual machines, with everything you need provided in a secure and straightforward environment.

Please note that we reserve the right to amend certain aspects of the course as published in this overview including, but not limited to, maximum class size, course content, technical requirements. If you have any questions about the specific course you book please contact us.
