Level 1 – Foundation

Duration: 1 Day

Online - Live virtual classroom training, guided by one of our experienced i2 trainers, and with each delegate accessing a personal virtual machine that contains the necessary software and course files.

Class size: A maximum of 6 delegates

"I want to be able to create association and timeline charts for more than simple visualisation and learn to structure charts correctly to enable effective analysis."
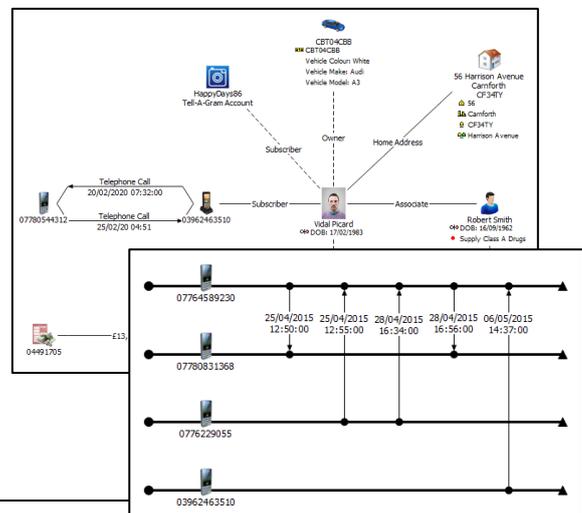

Course Content

- Introduction to Analyst's Notebook
- Structuring association and timeline charts:
  - Entity Representations: Icon, Theme Lines and Event Frames
  - Entity Types
  - The significance of Identities & Labels
  - Adding Attributes for structure
  - Adding a photo to an Entity
  - Where to put Date & Time
  - Why use Link Types
  - Adding Arrows to Links
  - Using Line Strengths
  - How structure effects simple searching
- Printing and Annotating charts

What data will I use?

You will use example Intelligence Reports that include:

- People
- Company information
- Places
- Events
- Social Media
- Communication data
- Transactions

What skills will I gain?

You will learn how to:

Build and structure Association and Timeline charts to enable understanding of the key concepts of Entities and Links; such as Identity, Date & Time, Description, and Attributes. This will allow the effective creation of charts for interpreting networks, sequences, and accurate analysis. You will also learn to annotate charts by using a Legend and Label, as well as to print them for dissemination.

What can I expect?

Our experienced trainers will provide a tutor-led and supportive training environment using a video conferencing platform – we will make the session friendly and interactive where you can ask questions and talk to the trainer, as well as other delegates. To make sure you have plenty of hands-on experience using the software we will provide each delegate with a virtual machine which will have all the i2 software and course files you will need.

Skills Prerequisites

You must be familiar with Microsoft Windows and opening, closing, and saving files.

Technical Requirements

For the best experience you will need to install the following software:

1.   Amazon WorkSpaces Client
2.   Zoom Client

It is a simple process, and we will send you all the of relevant links and details on how to do this. Both of these pieces of software need to be installed on the same machine, and tested, before the day of the course.

You can use your own personal computers (laptops, desktops, or iMacs) to attend this training as we provide the training environment which includes the necessary i2 IBM software and course materials. This is an option being used by customers where IT policy prevents them installing the Amazon WorkSpace and Zoom client software on to their work computers.

Is this the right course for you?

This course is aimed at new and self-taught users, or those who want to refresh their knowledge.

It suits those who are required to create charts manually, but not on a day-to-day basis. For users who would wish to use the tool regularly as an analysis tool, we would recommend attending the Analyst's Notebook Standard or using Analyst's Notebook with Cyber & other Digital Data Level 1 courses.

Where Next?

On completion of this course, you could attend the Analyst's Notebook Social Network Analysis and Analyst's Notebook Dissemination Level 2 courses.

If you also attend the 1-day course: Analyst's Notebook Introduction to Importing Level 1, you can attend any of the Analyst's Notebook Level 2 courses.

Training Data used in our Online Courses:

Our online courses are run using sets of training data that we have created to look and feel familiar to yours. We will never ask you to use or provide examples of your data or be in a position to access it. Our online courses are run using virtual machines, with everything you need provided in a secure and straightforward environment.

Please note that we reserve the right to amend certain aspects of the course as published in this overview including, but not limited to, maximum class size, course content, technical requirements. If you have any questions about the specific course you book please contact us.
