Colour Key:

Green rows are i2 Analyst's Notebook courses

Gold rows are i2 iBase courses

Orange rows are courses where we use iBase & Analyst's Notebook together

Level 1 - Foundation Courses are aimed at users who are new to i2, self-taught, or who have had no formal training; as well as those who would like to refresh their i2 Knowledge.

Level 2 - Progression Courses are aimed at those users who have already attended the relevant Level 1 Course(s), and wish to progress their skills.

Level 3 - Experienced Courses, like our iBase Designer Course, are for users who have attended at least the relevant Level 1 Standard Course, and our Level 2 Courses too, if possible. They require delegates to have a good understanding of all areas of the software.
