

Level 2 – Progression

Duration: 1 day

Class size: A maximum of 8 (classroom) and 6 (online)

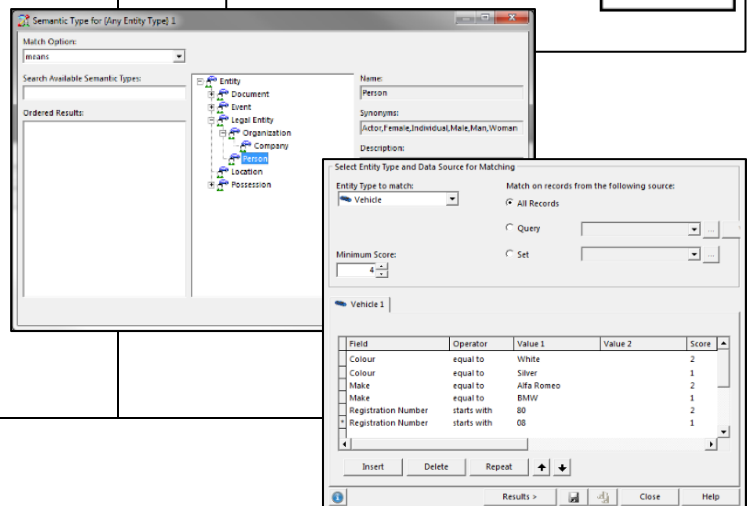

“I have noticed some options in the iBase analytical menu that I am not familiar with and would like to be able to use them with confidence.”

What skills will you gain?

- Increase your knowledge of the analytical functionality available in the software, especially around the use of advanced Query options.
- Build on previous knowledge gained from taking the iBase Standard Course, or by use of the software, over a period of time.
- Analyse data using a combination of functionality in order to make the most of iBase as an analytical tool.

Course Content

- Queries
 - Queries that prompt
 - Using Queries that count
 - Using Sets and Queries in a Query
 - Using AND/OR in Queries
 - Semantic Queries
- Browse Definitions
 - Including those that Auto-run
- Additional Tools
 - More advanced use of Search 360
 - Analysing and Comparing Sets
 - Scored Matching
 - Field Calculator

Semantic Type for (Any Entity Type) 1

Match Options: Search Available Semantic Types: Entity, Document, Event, Legal Entity, Organization, Company, Location, Possession

Name: Person
Synonyms: [rider], Female, Individual, Male, Man, Woman

Objectives

By the end of the course delegates will be able to:

- Create a variety of advanced Queries to ask key analytical questions of your data.
- Set up processes to increase efficiency.
- Use a combination of additional tools, including: Search 360, Comparing Sets, Scored Matching, and the Field Calculator
- Discover connections and patterns within the database and enhance the analytical process.

Course Delivery – what can you expect?

All of our courses are delivered by our own, in-house, highly experienced trainers, who specialise in training i2 software. We believe that to learn software effectively you need access to a friendly and professional training environment where you have the maximum time spent hands-on using the software; where questions and discussion are encouraged, and that makes you think about how anything you learn will be applied back at work.

What data will you use?

Our training uses sets of training data that we have created to look and feel familiar. We will never ask you to use or provide examples of your real data or be in a position to access it. You will use an array of example training data, such as:

- Intelligence including: People, Crimes, Locations, Telephones, Organisations and Chat Room data.

Is this the right course for you?

This course is aimed at:

- Users who are required to ask more complex questions of their data by understanding more of the analysis capabilities.

Prerequisites

You must have attended an iBase Level 1 – Foundation Course or be an experienced user who understands how to use iBase.

All courses are conducted in English so you should have a good understanding of spoken and written English. Please note translators can be used on closed courses.

Where Next?

Any iBase Level 2 - Progression Courses. More specifically:

- To understand more of the Import capabilities, attend the iBase Importing Course
- If you use iBase and Analyst's Notebook together then the Using iBase with Analyst's Notebook Course will help you control charting so you can use the Analyst's Notebook visualisation and analysis capability efficiently.

Technical Requirements (Online Courses Only)

Our online courses are run using virtual machines, with everything you need provided in a secure and straightforward environment. For the best experience you will need to install the following:

1. Amazon WorkSpaces Client
2. Zoom Client

It is a simple process, and we will send all the relevant links and details on how to do this. These need to be installed before the course.

You could use your own personal computers to attend this training as we provide the i2 software and course materials. This is an option being used by customers where IT policy prevents them installing the Amazon WorkSpace and Zoom client software on work computers.

Please note that we reserve the right to amend certain aspects of the course as published in this overview including, but not limited to, maximum class size, course content, technical requirements. If you have any questions about the specific course you book please contact us.
