Colour Key:

Green rows are i2 Analyst's Notebook courses, Gold are i2 iBase and  
Orange rows are courses where we focus on iBase & Analyst's Notebook together

Classroom courses are usually held at our office in Cambridge UK

The 1 day Bite-size courses are taken from our Analyst's Notebook and iBase Standard Courses

Level 1 - is aimed at new users, self-taught, or those with no formal training; as well as those who would like to refresh their i2 Knowledge.

Level 2 - is aimed at users who have already attended the relevant Level 1 Course(s), and wish to progress their skills.

Level 3 - Experienced Courses, like our iBase Designer Course, are for users who have attended at least the relevant Level 1 Standard Course, and our Level 2 Courses too, if possible. They require delegates to have a good understanding of all areas of the software.

**If the option you require is not listed above please do get in touch. If you have a group who need training we can schedule for when it is convenient to you. This includes Online, Classroom Cambridge, Classroom at your site, and customised courses. Minimum delegate numbers may apply.**
